

Do not change Indiana's Telephone Privacy Law in any way that would lessen my protections. It is so much more peaceful in my home. I have elderly and long distance family that caller Id does not pick up on their name & number so I have to answer every call in case I am needed. I was receiving so many unwanted calls I stopped answering and missed an emergency call because of that. Since signing up for the no call list, my life has had a major turn around for the better. It has been wonderful. I consider unwanted phone calls harassment. I used to receive 5 or more calls a day. Now I don't get any that I can think of. They would even call at bedtime which is 9 or 9:30 at night. So please consider my comments before making any changes.
